Application

UnitedHealthcare Commercial

This Medical Policy applies to UnitedHealthcare Commercial benefit plans.

UnitedHealthcare Individual Exchange

This Medical Policy applies to Individual Exchange benefit plans.

Coverage Rationale

Indications for Coverage

Introduction

UnitedHealthcare covers certain medical services under the preventive care services benefit. The federal Patient Protection and Affordable Care Act (PPACA) requires non-grandfathered health plans to cover certain “recommended preventive services” as identified by PPACA under the preventive care services benefit, without cost sharing to members when provided by network providers. This includes:

- Evidence-based items or services that have in effect a rating of “A” or “B” in the current recommendations of the United States Preventive Services Task Force.

- Immunizations for routine use in children, adolescents and adults that have in effect a recommendation from the *Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention*.
- With respect to infants, children and adolescents, evidence-informed preventive care and screenings provided for in the comprehensive guidelines supported by the *Health Resources and Services Administration*.
- With respect to women, such additional preventive care and screenings as provided for in comprehensive guidelines supported by the *Health Resources and Services Administration*.

Member Cost-Sharing

Non-Grandfathered Plans

- Non-grandfathered plans provide coverage for preventive care services with no member cost sharing (i.e., covered at 100% of Allowed Amounts without deductible, coinsurance, or copayment) when services are obtained from a Network provider.
- Under PPACA, services obtained from an out-of-network provider are not required to be covered under a plan's preventive benefit and may be subject to member cost sharing. Refer to the member specific benefit plan document for out-of-network benefit information, if any.

Grandfathered Plans

- Plans that maintain grandfathered status under PPACA are not required by law to provide coverage for these preventive services without member cost sharing; although a grandfathered plan may choose to voluntarily amend its plan document to include these preventive benefits.
- Except where there are state mandates, a grandfathered plan might include member cost sharing, or exclude some of the preventive care services identified under PPACA.
- Refer to the member specific benefit plan document for details on how benefits are covered under a grandfathered plan.

Preventive vs. Diagnostic Services

Certain services can be done for preventive or diagnostic reasons. When a service is performed for the purpose of preventive screening and is appropriately reported, it will be considered under the preventive care services benefit. This includes services directly related to the performance of a covered preventive care service (refer to the [Frequently Asked Questions](#) section for additional information.)

Preventive services are those performed on a person who:

- has not had the preventive screening done before and does not have symptoms or other abnormal studies suggesting abnormalities*; or
- has had screening done within the recommended interval with the findings considered normal; or
- has had diagnostic services results that were normal after which the physician recommendation would be for future preventive screening studies using the preventive services intervals.

*In the case of a colonoscopy done as a follow-up to a positive stool-based screening (e.g., FIT, FOBT, and fecal DNA) or direct visualization screening (e.g., sigmoidoscopy or CT colonography), refer to FAQ#4 below.

When a service is done for diagnostic purposes, it will be considered under the applicable non-preventive medical benefit. Diagnostic services are done on a person who:

- had abnormalities found on previous preventive or diagnostic studies that require further diagnostic studies; or
- had abnormalities found on previous preventive or diagnostic studies that would recommend a repeat of the same studies within shortened time intervals from the recommended preventive screening time intervals; or
- had a symptom(s) that required further diagnosis; or
- does not fall within the applicable population for a recommendation or guideline.

Covered Breastfeeding Equipment

Personal-use electric breast pump:

- The purchase of a personal-use electric breast pump (HCPSC code E0603).
 - This benefit is limited to one pump per birth. In the case of a birth resulting in multiple infants, only one breast pump is covered.
 - A breast pump purchase includes the necessary supplies for the pump to operate.
- Replacement breast pump supplies necessary for the personal-use electric breast pump to operate. This includes: standard power adaptor, tubing adaptors, tubing, locking rings, bottles specific to breast pump operation, caps for bottles that are specific to the breast pump, valves, filters, and breast shield and/or splash protector for use with the breast pump.

- Breastmilk storage bags (HCPCS code A4287).

Colonoscopies

Colonoscopy – Preventive Care Services Benefit (Without Member Cost-Sharing)

Member cost-sharing for colonoscopy is waived when all of the following apply:

- The patient's age is 45-75 years (ends on 76th birthday) as recommended by the USPSTF; and
- The provider is participating in the network; and
- When billed in accordance with the coding in the [Colorectal Cancer Screening](#) row listed in this policy.

Colonoscopy may require a site of service review. Refer to the Medical Policies titled [Screening Colonoscopy Procedures – Site of Service](#) and [Outpatient Surgical Procedures – Site of Service](#).

Colonoscopy – Medical Benefit (With Member Cost-Sharing)

Member cost-sharing may apply when a colonoscopy is done in any one of the following scenarios:

- The patient's age is outside of the age recommendation of the USPSTF (age 45-75 years); or
- The provider is non-network; or
- Colonoscopy performed with a shortened time interval outside of the USPSTF recommendations; or
- Colonoscopy performed for diagnostic purposes; or
- Colonoscopy performed for surveillance purposes (e.g., a follow-up colonoscopy performed after identification or removal of a polyp or cancer on a previous colonoscopy); or
- Colonoscopy performed for therapeutic/treatment purposes.

The above colonoscopies may require advanced notification and/or site of service review. Refer to the [Gastrointestinal Colonoscopy Procedure Guidelines](#) and the Medical Policy titled [Outpatient Surgical Procedures – Site of Service](#).

Coverage Limitations and Exclusions

- Services not covered under the preventive care benefit may be covered under another portion of the medical benefit plan.
- The coverage outlined in this policy does not address certain outpatient prescription medications, tobacco cessation drugs and/or over the counter items, as required by PPACA. These preventive benefits are administered by the member's pharmacy plan administrator. For details on coverage, refer to the member-specific pharmacy plan administrator.
- A vaccine (immunization) is not covered if it does not meet company vaccine policy requirements for FDA labeling and if it does not have explicit ACIP recommendations for routine use published in the Morbidity and Mortality Weekly Report (MMWR) of the Centers for Disease Control and Prevention (CDC) and is not listed on the applicable immunization schedule of ACIP. (Refer to the [Preventive Care Services: Vaccine Codes](#).)
- Examinations, screenings, testing, or vaccines (immunizations) are not covered when:
 - required solely for the purposes of career or employment, school or education, sports or camp, travel [including travel vaccines (immunizations)], insurance, marriage, or adoption; or
 - related to judicial or administrative proceedings or orders; or
 - conducted for purposes of medical research; or
 - required to obtain or maintain a license of any type.
- Services that are investigational, experimental, unproven, or not medically necessary are not covered.
- Breastfeeding equipment and supplies not listed above. This includes, but is not limited to:
 - Manual breast pumps and all related equipment and supplies.
 - Hospital-grade breast pumps and all related equipment and supplies.
 - Equipment and supplies not listed in the [Covered Breastfeeding Equipment](#) section above, including but not limited to:
 - Batteries, battery-powered adaptors, and battery packs.
 - Electrical power adapters for travel.
 - Bottles which are not specific to breast pump operation. This includes the associated bottle nipples, caps, and lids.
 - Travel bags, and other similar travel or carrying accessories.
 - Breast pump cleaning supplies including soap, sprays, wipes, steam cleaning bags and other similar products.
 - Baby weight scales.
 - Garments or other products that allow hands-free pump operation.

- Breast milk storage accessories such as ice-packs, labels, labeling lids, and other similar products. The breastmilk storage accessories exclusion does not apply to breastmilk storage bags (HCPCS code A4287).
- Nursing bras, bra pads, breast shells, nipple shields, and other similar products.
- Creams, ointments, and other products that relieve breastfeeding related symptoms or conditions of the breasts or nipples.

Note: Refer to the [Indications for Coverage](#) section above for covered breastfeeding equipment.

Frequently Asked Questions (FAQ)

1	Q:	If a polyp is encountered during a preventive screening colonoscopy, are future colonoscopies considered under the preventive care services benefit?
	A:	No. If a polyp is removed during a preventive screening colonoscopy, future colonoscopies would normally be considered to be diagnostic because the time intervals between future colonoscopies would be shortened.
2	Q:	Are the related therapeutic services for a preventive colonoscopy covered under the preventive care benefit?
	A:	Yes, related services integral to a colonoscopy are covered under the preventive care services benefit including: pre-operative examination, the associated facility, anesthesia, polyp removal (if necessary), pathologist and physician fees. However, the preventive benefit does not include a post-operative examination.
3	Q:	Do any preventive care services require prior-authorization?
	A:	Certain services require prior-authorization on most benefit plans. This includes, but may not be limited to: BRCA lab screening, computed tomographic colonography (virtual colonoscopy), and screening for lung cancer with low-dose computed tomography.
4	Q:	If a member in the age range of 45-75 years has a positive stool-based colorectal cancer screening test (e.g., FIT, FOBT, and fecal DNA) or direct visualization screening test (e.g., sigmoidoscopy or CT colonography), and has a follow up colonoscopy, is the colonoscopy included in the preventive care services benefit?
	A:	Yes, in this situation, the colonoscopy would be considered under the preventive care services benefit when billed in accordance with the coding in the Colorectal Cancer Screening row listed in this policy.
5	Q:	For preventive services that have a diagnosis code requirement, does the listed diagnosis code need to be the primary diagnosis on the claim?
	A:	In general, most preventive services do not require the preventive diagnosis code to be in the primary position. However, certain preventive services do require the diagnosis code to be in the primary position, which include: (1) Chemoprevention of Breast Cancer (Counseling), (2) Genetic Counseling and Evaluation for BRCA Testing, and (3) Prevention of Human Immunodeficiency Virus (HIV) Infection.
6	Q:	If a woman has an abnormal finding on a preventive screening mammography and the follow up mammogram was found to be normal, will UnitedHealthcare cover her future mammograms under the preventive care services benefit?
	A:	Yes, if the member was returned to normal mammography screening protocol, her future mammography screenings would be considered under the preventive care services benefit.
7	Q:	If a member had elevated cholesterol on a prior preventive screening, are future cholesterol tests considered under the preventive care services benefit?
	A:	Once the diagnosis has been made, further testing is considered diagnostic rather than preventive. This is true whether or not the member is receiving pharmacotherapy.
8	Q:	Are the related services for a woman's outpatient sterilization or other contraceptive procedure covered under the preventive care benefit?
	A:	Related services for a woman's outpatient sterilization or other contraceptive procedure are covered under the preventive care services benefit. This includes associated implantable devices, facility fee, anesthesia, and surgeon/physician fees. If a woman is admitted to an inpatient facility for another reason (e.g., maternity/delivery), and has a sterilization or other contraceptive procedure performed during that admission, the sterilization or other contraceptive procedure fees are covered under

		the preventive care services benefit. This includes associated sterilization/ contraception surgical fees, device fees, anesthesia, pathology, and physician fees. However, the facility fees are not covered under the preventive care benefit since the sterilization or other contraceptive procedure is incidental to, and is not the primary reason, for the inpatient admission.
9	Q:	Are blood draws/venipunctures included in the preventive care benefit?
	A:	Yes, blood draws/venipunctures are considered under the preventive benefit if billed for a covered preventive lab service that requires a blood draw.
10	Q:	Is a newly-combined vaccine (a vaccine with several individual vaccines combined into one) covered under preventive care benefits?
	A:	A new vaccine that is pending ACIP recommendations, but is a combination of previously approved individual components, may be eligible under the preventive care benefit.
11	Q:	Are preventive care services affected by other policies?
	A:	Yes, including for example, the Reimbursement Policy titled Preventive Medicine and Screening Policy describes situations which may affect reimbursement of preventive care services.
12	Q:	Are travel vaccines covered under preventive care benefits?
	A:	Benefits for preventive care services include vaccines for routine use in children, adolescents and adults that have in effect a recommendation from ACIP with respect to the individual involved. Vaccines that are specific to travel (e.g., typhoid, yellow fever, cholera, plague, and Japanese encephalitis virus) are excluded from the preventive care services benefit.
13	Q:	Does the preventive care services benefit include prescription or over the counter (OTC) items?
	A:	Refer to the plan's pharmacy benefit plan administrator for details on prescription medications and OTCs available under the plan's preventive benefit.

Definitions

The following definitions may not apply to all plans. Refer to the member specific benefit plan document for applicable definitions.

Modifier 33: Preventive service; when the primary purpose of the service is the delivery of an evidence based service in accordance with a US Preventive Services Task Force A or B rating in effect and other preventive services identified in preventive services mandates (legislative or regulatory), the service may be identified by adding 33 to the procedure. For separately reported services specifically identified as preventive, the modifier should not be used.

Note: UnitedHealthcare considers the procedures and diagnostic codes and Preventive Benefit Instructions listed in the table below in determining whether preventive care benefits apply. While Modifier 33 may be reported, it is not used in making preventive care benefit determinations.

Acronyms

Throughout this document the following acronyms are used:

- USPSTF: United States Preventive Services Task Force
- PPACA: Patient Protection and Affordable Care Act of 2010
- ACIP: Advisory Committee on Immunization Practices
- HRSA: Health Resources and Services Administration

Applicable Codes

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Listing of a code in this policy does not imply that the service described by the code is a covered or non-covered health service. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply. CPT® is a registered trademark of the American Medical Association.

Preventive Care Services

Applies to age 18+ when billed with one of the BRCA Lab Screening diagnosis codes listed in this row.</p> <p><i>Blood Draw:</i> Requires one of the BRCA Lab Screening procedure codes listed in this row and one of the BRCA Lab Screening diagnosis codes listed in this row.</p>

Preventive Care Services

Also see the [Expanded Women's Preventive Health](#) section.

Certain codes may not be payable in all circumstances due to other policies or guidelines.

For preventive care medications, refer to the pharmacy plan administrator.

Service A date in this column is when the listed rating was released, not when the benefit is effective.	Code(s)	Preventive Benefit Instructions Refer to Coverage Rationale, and FAQ's sections above for additional instructions.
<i>Screening for Pre-Diabetes and Type 2 Diabetes</i> USPSTF Rating (Aug. 2021): B The USPSTF recommends screening for prediabetes and type 2 diabetes in adults aged 35 to 70 years who have overweight or obesity. Clinicians should offer or refer patients with prediabetes to effective preventive interventions. Refer to Healthy Diet and Physical Activity for Cardiovascular Disease Prevention in Adults with Cardiovascular Risk Factors: Behavioral Counseling Interventions for intensive behavioral counseling interventions. For additional diabetes screening benefits, also see the <i>Expanded Women's Preventive Health</i> section for Screening for Diabetes in Pregnancy and Screening for Diabetes After Pregnancy . <i>Well-Woman Preventive Visits</i> HRSA Requirement (Dec. 2021): WPSI Recommends that women receive at least one preventive care visit per year beginning in adolescence and continuing across the lifespan to ensure the provision of all recommended preventive services, including preconception and many services necessary for prenatal and interconception care, are obtained. The primary purpose of these visits should be the delivery and coordination of recommended preventive services as determined by age and risk factors. These services may be completed at a single or as part of a series of visits that take place over time to obtain all necessary services depending on a woman's age, health status, reproductive health needs, pregnancy status, and risk factors. Well-women visits also include pre-pregnancy, prenatal, postpartum and interpregnancy visits. Also see Wellness Examinations and other USPSTF	Procedure Code(s): <i>Well-Woman Visits:</i> See the Wellness Examinations row in the <i>Preventive Care Services</i> section. <i>Prenatal Office Visits:</i> Evaluation and Management (Office Visits): 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99417, G0463 <i>Pelvic Examination (add-on code):</i> 99459 <i>Physician Prenatal Education, Group Setting:</i> 99078 <i>Prenatal Care (Antepartum) Visits:</i> 59425, 59426 <i>Global Obstetrical Codes:</i> 59400, 59510, 59610, 59618	<i>Well-Woman Visits:</i> See the Wellness Examinations row in the <i>Preventive Care Services</i> section. <i>Prenatal Office Visits:</i> Requires a Pregnancy Diagnosis Code . <i>Pelvic Examination add-on code 99459:</i> Preventive care services benefits may apply to 99459 when the related evaluation and management (office visit) code is applied to the preventive care services benefit. CPT code 99459 may not be payable in all circumstances due to other policies or guidelines. <i>Physician Prenatal Education, Group Setting:</i> Requires a Pregnancy Diagnosis Code . <i>Prenatal Care (Antepartum) Visits:</i> Does not have diagnosis code requirements for the preventive benefit to apply. <i>Global Obstetrical Codes:</i> The routine, low-risk, prenatal visits portion of the code is covered as preventive.

<p>a woman's sexual history and risk factors to help identify those at an increased risk of STIs. Risk factors include, but are not limited to, age younger than 25, a recent history of an STI, a new sex partner, multiple partners, a partner with concurrent partners, a partner with an STI, and a lack of or inconsistent condom use.</p> <p>For adolescents and women not identified as high risk, counseling to reduce the risk of STIs should be considered, as determined by clinical judgment.</p>		
<p><i>Screening for Human Immunodeficiency Virus Infection (HIV)</i></p> <p>HRSA Requirement (Dec. 2021): The Women's Preventive Services Initiative (WPSI) recommends all adolescent and adult women, ages 15 and older, receive a screening test for human immunodeficiency virus (HIV) at least once during their lifetime. Earlier or additional screening should be based on risk, and rescreening annually or more often may be appropriate beginning at age 13 for adolescent and adult women with an increased risk of HIV infection. The WPSI recommends risk assessment and prevention education for HIV infection beginning at age 13 and continuing as determined by risk. A screening test for HIV is recommended for all pregnant women upon initiation of prenatal care with rescreening during pregnancy based on risk factors. Rapid HIV testing is recommended for pregnant women who present in labor with an undocumented HIV status.</p>	<p><i>Education and Risk Assessment</i> See the Wellness Examinations row in the <i>Preventive Care Services</i> section above</p> <p><i>Screening Tests</i> See the HIV (Human Immunodeficiency Virus) Screening for Adolescents and Adults row in the <i>Preventive Care Services</i> section above</p>	<p><i>Education and Risk Assessment</i> See the Wellness Examinations row in the <i>Preventive Care Services</i> section above.</p> <p><i>Screening Tests</i> See the HIV (Human Immunodeficiency Virus) Screening for Adolescents and Adults row in the <i>Preventive Care Services</i> section above.</p>

<p><i>Breast Cancer Screening for Average-Risk Women</i></p> <p>HRSA Requirement (Dec. 2016): Recommends that average-risk women initiate mammography screening no earlier than age 40 and no later than age 50. Screening mammography should occur at least biennially and as frequently as annually. Screening should continue through at least age 74 and age alone should not be the basis to discontinue screening. These screening recommendations are for women at average risk of breast cancer. Women at increased risk should also undergo periodic mammography screening; however, recommendations for additional services are beyond the scope of this recommendation.</p>	<p>See the Screening Mammography row in the <i>Preventive Care Services</i> section above.</p>	<p>See the Screening Mammography row in the <i>Preventive Care Services</i> section above.</p>
<p><i>Screening for Cervical Cancer</i></p> <p>HRSA Requirement (Dec. 2016): Recommends cervical cancer screening for average-risk women aged 21 to 65 years. For women aged 21 to 29 years recommends cervical cancer screening using cervical cytology (Pap test) every 3 years. Co-testing with cytology and human papillomavirus testing is not recommended for women younger than 30 years. Women aged 30 to 65 years should be screened with cytology and human papillomavirus testing every 5 years or cytology alone every 3 years. Women who are at average risk should not be screened more than once every 3 years.</p>	<p><i>Human Papillomavirus DNA Testing (HPV)</i> See the Cervical Cancer Screening row in the <i>Preventive Care Services</i> section above.</p> <p><i>Cervical Cytology (Pap Test)</i> See the Cervical Cancer Screening row in the <i>Preventive Care Services</i> section above.</p>	<p><i>Human Papillomavirus DNA Testing (HPV)</i> See the Cervical Cancer Screening row in the <i>Preventive Care Services</i> section above.</p> <p><i>Cervical Cytology (Pap Test)</i> See the Cervical Cancer Screening row in the <i>Preventive Care Services</i> section above.</p>

Instructions for Use

This Medical Policy provides assistance in interpreting UnitedHealthcare standard benefit plans. When deciding coverage, the member specific benefit plan document must be referenced as the terms of the member specific benefit plan may differ from the standard plan. In the event of a conflict, the member specific benefit plan document governs. Before using this policy, please check the member specific benefit plan document and any applicable federal or state mandates. UnitedHealthcare reserves the right to modify its Policies and Guidelines as necessary. This Medical Policy is provided for informational purposes. It does not constitute medical advice.

This Medical Policy may also be applied to Medicare Advantage plans in certain instances. In the absence of a Medicare National Coverage Determination (NCD), Local Coverage Determination (LCD), or other Medicare coverage guidance, CMS allows a Medicare Advantage Organization (MAO) to create its own coverage determinations, using objective evidence-based rationale relying on authoritative evidence ([Medicare IOM Pub. No. 100-16, Ch. 4, §90.5](#)).

UnitedHealthcare may also use tools developed by third parties, such as the InterQual® criteria, to assist us in administering health benefits. UnitedHealthcare Medical Policies are intended to be used in connection with the independent professional medical judgment of a qualified health care provider and do not constitute the practice of medicine or medical advice.
